Li -10N

Compact, manoeuvrable, stable and efficient

P013i

Maximum efficiency with our Li-ion powered pallet truck delivering the higest level of safety, speed and productivity.

www.cesab-forklifts.eu

•

Fast and simple battery exchange, with safe and easy to use connectors.

Li-ion battery technology, can be charged anywhere so there is no necessity for a dedicated charging space.

Epic Energy

A superior 24V 36Ah battery, almost the double capacity of equivalent models.

101

The powerful battery comes in cassette format, fully sealed and easy to handle. The connectors are protected so no risk of short circuits.

Quick Charging

The 12A fast charger is standard, over and above the normal 8A rate of similar pallet trucks.

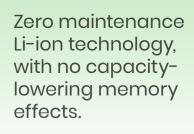

24136

ŵ

Quick and easy charging in 2.5 hours or less.

Reliable and wellengineered battery connectors.

Both the drive wheel and the castor wheels have safe foot protections as standard.

Easy long-side pallet handling. Twin fork wheels as standard, for reduced pressure on floors and easier and silent travel over uneven surfaces.

Stable as a Rock

Stable with standard caster wheels offering 5 points of contact.

The rugged construction of the caster wheels and the 80mm diameter don't fear loading boards or docks.

Max Manouvers

Only 540mm wide, 1.3 tonnes capacity and great 115mm lift height.

The 195° steering angle allows easy maneuvering, even in the tightest spaces. Faster drive speeds of 4.8 km per hour, and turtle speed when tiller arm is in vertical position.

Ergonomic butterfly switches for easy driving. Separated buttons for fast lifting and lowering. The standard PIN-pad prevents unauthorised use.

Safe speed reduction when cornering, included as standard.
